

Section 32 Best-of-Best — QA Report

Workbook integrity and substantive-control review

Control	Result	Evidence
Native XLSX opens	PASS	13 visible template tabs
Expected tab count/order	PASS	Overview, Title , OGL, PLAT, Runsheet, Tract 1, Tract 2, Tract 3, Tract 4, Tract 5, WI 2, WI 1, Well 1
No hidden worksheets	PASS	All visible
No formula/error tokens	PASS	None
No external-link formulas	PASS	None
No identified donor tokens	PASS	None
No donor metadata in docProps/core.xml	PASS	Metadata sanitized
Defined names valid	PASS	No broken names
Print areas set	PASS	All tabs
Title qualification visible	PASS	Required qualification located
Diversified address visible	PASS	Title summary
Estimated acreage labeled	PASS	Title headings and notes
HBP qualified	PASS	Lease-specific qualification used
PLAT visible/readable setup	PASS	'PLAT'!\$A\$1:\$AF\$39

Material limitations carried forward

C-01 — V7 names estimated owners and closes each tract arithmetically, while its hidden QA says no tract is documentarily closed.
Owners retained as estimated last-located record owners. Every owner and tract total is visibly qualified.
Complete forward county/probate search through effective date.

C-02 — V7 labels several leases HBP; FV warns section-level production is not lease-specific HBP proof.
All statuses changed to 'HBP not independently confirmed,' 'status not determined,' or assumed potentially effective.
Lease-by-lease savings-clause and production analysis.

C-03 — 51.25% Diversified transaction figure can be mistaken for current Section 32 WI.
Shown only as a transaction branch. 48.75% OCM Denali is separate. 15.000875% is labeled arithmetic only.
Obtain complete exhibits A/B/C and excluded-asset schedules.

C-04 — Missing Tapstone/KL CHK/asset bridge and co-assignee allocation.
No exact current WI/NRI or net leasehold acres stated.
Pull and abstract complete schedules and incorporated agreements.

C-05 — Modern asset schedule supports OK48147.001.1 but legal/interest fields are blank.
Diversified Production LLC is the latest supported named claimant, not a proven 640-acre/100% owner.
Read complete 2395/415-464 and 2400/551-567.

C-06 — Book 1697/Page 236 versus separate 1697/Page 574 references.
Both are kept distinct; 1697/236 is the asset-reference bridge lead and its Exhibit A is required.
Pull both complete instruments and reconcile schedules.

C-07 — Crook probate and NE/4 current vesting remain incomplete.
Five 8-NMA rows carried as estimated last-located record owners; residual branches remain assumed.
Acquire complete Crook probate and forward conveyances.

C-08 — SE/4 sovereign inception is only a receiver receipt; Biggs/Bigge name and patent are unresolved.
Velmore Biggs receiver receipt shown as earliest located evidence; no patent conclusion.
Locate certified SE/4 patent and reconcile spelling.

C-09 — Carlson well evidence conflicts across prior candidates.
All three are retained as Section 32 regulatory leads with Latigo operator and explicit no-title/no-HBP limitation.
Reconfirm current OCC well and operator records and legal descriptions.

C-10 — Google Drive and Dropbox authoritative roots were identified but connectors were unavailable in this run.
Repository-preserved candidates, extracts, manifests and source backups were used; access limitation disclosed.
Independent audit against Drive folder and Dropbox /11N 25W 32.

C-11 — Map in prior workbook was hidden or too small.
PLAT rebuilt as a visible one-page seven-tract diagram using template palette.
Confirm final Excel desktop print rendering.

C-12 — The 11 historic Union/Leede lease rows overlap.
No additive lease-acre or net-acre conclusion; overlap and S/2 NW/4 gap disclosed.
Map each operative modern schedule lease-by-lease.

C-13 — Post-cutoff Bk 2434/Pg 751 assigns assets from Diversified/DP Legacy Central to Teocalli, but its schedule is unread.
Diversified is described only as the latest supported named claimant through Bk 2400/Pg 551-567, subject to this potential later divestiture.
Read the complete 2434/751 assignment and determine whether Section 32 or OK48147.001.1 is included.

Independent landman and complete-record review remain required before reliance as a title opinion.
