Status at delivery
36 rows carry the section call "6-47N-76W" with no aliquot. Section applicability proved; aliquot NOT proved. Not invented.
Literal "Unknown" removed; cell left genuinely blank. Blanking does NOT close the research issue.
Counts sheet of the source workbook still shows county inception/certified-through as not established.
Filled as "US Realm Powder River, LLC" from SRP lessee of record; flagged source-derived.
BLM rows carried forward from the verified S06_WYW149799_Combined_Parts_1-2 production file (SHA recorded) and cross-checked against the 10/13/2026 SRP. No independent page-by-page image re-verification was performed here.
The 69 rows are the full qualified historical recording set carried from the source workbook; the tract index screen reports 32 current hits. These count different things and were NOT reconciled in this pass.
Per standing owner instruction, no completion or certification claim is made.
